

Conversation is the goal Invite. Don't Fight.

You could first...

1. Pause and wait for a response
2. Use your body & face to show that you are waiting expectantly
3. Use visual cues to reference the topic of conversation
4. Ask an open-ended question to invite a response
5. Model a response on the AAC system

Or, would you....

Grab the person's hand and force them to respond (really, **don't** do this)
